HANDLING & STERILIZING

ROTARY STEAM AIR RETORTS

OVERPRESSURE STEAM-AIR PROCESSING with HIGH SPEED ROTARY AGITATION

Severe-duty steam-air sterilization retorts

Allpax manufactures production capacity, severe-duty Steam-Air sterilization retorts that are used to process pouches, trays, and bottles. A heavy-duty door fan circulates the steam-air mixture throughout the steam retort and direct high-volume water spray provides cooling. The steam-air retort ensures quality, durable equipment for retort needs. With an all stainless steel construction, the steam-air retort is dependable and sturdy. Custom retort lengths to optimize capacity for your container.

FEATURES AND BENEFITS

- Preheated air injection
- High flow spray cooling
- Up to 10 RPM rotary agitation
- Modular trunnion rollers
- Bi-directional load clamping
- Fully automated process control
- Space saving overhead orbiting door
- 304 stainless steel construction
